

## LIFEBOOK P7120

### The mini with maximum style

Issue April 2006

Pages 4

The LIFEBOOK P Series opens a new chapter on weight, size and design.

Whether you travelling by car, train or airplane, the ultraportable LIFEBOOK P Series is perfectly adapted for use on the move. It's light – less than 1.3 kg. It's as powerful as most desktops and with a battery life of more than 11.5 hours, you can do a days work between charges. Swop out the second battery and you can have a fully functional CD combo drive or DVD writer. It has more connections than you'll ever need - from SD card slot to FireWire. There's WLAN too! Take advantage of the growing network of wireless hotspots and catch up with emails at faster speed than broadband. It's "Intel inside" with the latest Intel® Centrino™ Mobile Technology.

Smart people on the move appreciate the style and dynamics of a truly different notebook, whether number crunching, word processing or watching a DVD on a amazingly clear and sharp 10.6-inch wide format XGA Crystal View TFT-display.

The new LIFEBOOK P7120 is not only small, it's secure too. Just swipe your finger to the integrated biometric fingerprint sensor or remember a single master password to keep all of your system log-ins and data protected.

### Mobility

#### Convenient to travel

- Only 1.28 kg - lightest full functional multimedia notebook with an ultra-slim modular bay in an extremely small package
- Enjoy the viewing quality of brilliant 10.6 -inch wide format XGA Crystal View TFT display
- Modular bay offers highest flexibility: DVD writer or second battery
- Stylish slim case for save carrying is included

#### Long independence from power source

- Latest technology bundle in small design without compromising on functionalities: Power-saving Intel® Pentium® M Ultra Processor Low Voltage (ULV)
- Long lasting battery more than 11.5 hours with first and second battery
- Save energy and extend your battery life with the integrated EcoButton

#### Ideal connectivity on the road and in the office

- Ideal connectivity through integrated modem, LAN, Bluetooth and Wireless LAN
- Perfect partner with interfaces for every day use
- Port Replicator optionally available for simple connection to all your peripherals

#### Robustness on the run

- Integration of Japanese innovation and German quality standard for low failure rates
- Award-winning best-in-class manufacturing
- Highest quality design with magnesium lid
- Hard disk drive shock absorbers minimize data loss and guarantee a higher reliability of your data
- Mechanical and function stability through extensive quality tests

#### Security to protect your sensible data away from the office

- Trusted Platform Module (TPM) authenticates system platform to ensure the highest level of data protection - a vault - like combination of an integrated security chip with sophisticated date encryption software.
- Biometric fingerprint sensor puts industry-leading data security at your fingertips. Swipe your finger or remember a single master password to keep all your system log-ins and data protected.
